Continuation of Disposition of Claims: Claims withdrawn from consideration are 6,7,⁸₁₁,12,14-17,23,24,26,34-40,42-46,49,50,53-65,68,76-85,88-93 and 95.

Claims 59-61 have been amended to read on the non-elected species of figure 28 and are withdrawn. Similarly, claims 84, 92, 93, and 95 are directed to the non-elected species of Figures 1 and 2.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3, 4, 9, 19-21, 25, 27, 29, 32, 47, 48, 51, 66, 67, 74, and 97-99 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hollnagel.

Claim 69, 74 and 94 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eckhouse ('478).

Claims 28-30, 70-72, 100, and 101 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hollnagel in combination with Currey. Hollnagel teaches a device such as claimed except the concave surface. Currey teaches a device such as claimed except concentrating the beam. It would have been obvious to the artisan of ordinary skill to employ the concentrating waveguide in the device of Currey, since this provides better tissue penetration, as taught by Hollnagel or to employ the concave vacuum contact surface of Currey with device of Hollnagel, since this provides a most favorable condition for the tissues to be subjected to the action of the radiation, as taught by Currey, thus producing a device such as claimed.

Claims 10 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al ('041) in combination with Hollnagel. Anderson et al ('041) teach employing a diffuse reflector in a light treatment device. Hollnagel teaches the desirability of coating a waveguide with reflective material. It would have been obvious to the artisan of ordinary skill to employ the coating of Hollnagel in the device of Anderson et al, since this more efficiently

transports the light, as taught by Hollnagel, or to employ the diffuse reflector of Anderson et al ('041) in the device of Hollnagel, since this provides a more uniform output which is desirable as taught by Anderson et al ('041), thus producing a device such as claimed.

Claims 1 and 96 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eckhouse ('478) in combination with Hollnagel. Eckhouse ('478) teaches a device such as claimed except the reduced gap. Hollnagel teaches a device as claimed except the dimension of greater than 10 mm. It would have been obvious to the artisan of ordinary skill to include the reflective coating arrangement of Hollnagel in the device of Eckhouse ('478), since this would increase the efficiency thereof, or to employ the waveguide dimensions of Eckhouse ('478) in the device of Hollnagel, since this is a desirable design for cutaneous surgery, as taught by Eckhouse ('478) thus producing a device such as claimed.

Applicant's arguments with respect to claims 1, 3, 4, 8-10, 19-21, 25, 27-30, 32, 47, 48, 51, 52, 66, 67, 69-72, 74, 94, and 96-101 have been considered but are moot in view of the new ground(s) of rejection.

This is a Request for Continuing Examination of applicant's earlier Application No. 10/080,652. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3735

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
